Dear stakeholders,

I am pleased to inform you that the Immigration and Refugee Board of Canada (IRB) has now received approval for new Immigration Appeal Division Rules, 2022. The new IAD Rules will come into force on January 14, 2023.

The new Rules, which replace the old Rules introduced in 2002, will modernize the appeal process and help to ensure the IAD resolves appeals effectively, fairly and in accordance with the law. A [Summary of key changes to the Immigration Appeal Division Rules](#) is available on the IRB website.

You can learn more about the new IAD Rules once they are published in the Canada Gazette, Part II, along with a Regulatory Impact Analysis Statement that explains how we addressed your feedback when developing the new Rules.

In addition, in the coming weeks we will be offering information sessions for counsel. These sessions will be conducted virtually on Microsoft Teams. Recordings of the sessions will be made available. Additional information regarding these sessions will follow.

We are confident the new IAD Rules will help achieve our shared objective of ensuring greater access to justice for persons appearing before the IAD.

Please share this message with your membership as you deem appropriate. Thank you once again for your ongoing engagement.

New episode of the Global Migration Podcast is now available:

[Belonging in Unceded Territory](#)

Canada is lauded for its multiculturalism and being a welcoming host society to migrant newcomers. But discourses around settlement and integration tend to ignore the realities of Canada's status as a settler colonial state. What would it mean to take seriously the fact that these are Indigenous lands to which Canada has no right to offer welcome? Can practices of immigration and settlement be reconciled with the possibility of decolonization? These are the questions that brought together partners in Coast Salish territories – or, Vancouver, BC – for a multi-year research collaboration called "Belonging in Unceded Territory." With newcomer and Indigenous community members from [Frog Hollow Neighborhood House](#), [migration scholars from CMS](#), and staff from [Immigrant Services Society of BC](#) and the [Affiliation of Multicultural Societies and Service Agencies of BC](#), space is being made for new narratives of belonging. What will they be?

Call for Community Partner Projects: Information & Data Design Course

UBC's **INFO 300 (Information and Data Design)** course is looking for Community Partners to provide Community Engaged Learning projects for students.

Description: User experience (UX) is concerned with every aspect of the user's interaction with a product, service, or organization that make up the user's perceptions of the whole. UX design as a discipline encapsulates elements such as website design, applications design (desktop or mobile), interaction design, user research, and usability assessment of products or services.

In this course, undergraduate students will **learn the fundamentals of UX design and work on a major group project to apply the skills learned throughout the course.** The students' projects can be focused on a variety of topics/areas related to UX such as (but not limited to):

- Conducting user research to identify opportunities for re-design of a product or service;
- Designing a user interface prototype for a product or service based on a series of requirements;
- Conducting a usability evaluation of a product or service to identify current interaction pain points and propose design solutions to mitigate findings.

Course timeline: From January 9th, 2023 to April 14th, 2023.

Engagement Details: The community-engaged learning (CEL) model in this course is a **project-based engagement.** Students will meet with their partnering organization three to four times throughout the semester. Meetings will be held in person or virtually (whichever is preferred).

What will students learn from this experience?

- 1.How to execute a UX project with an organization in our community
- 2.How to interact with different stakeholders from different milieus
- 3.How to recognize and account for the needs of a not-for-profit organization in their design practice; and 4) contribute to the life of a not-for-profit organization in our community.

- Work with Core Team members to plan the '23 Youth Action Gathering, participate in CCR events and create additional Youth Network initiatives.
- Travel to in-person events (happening throughout the year) such as Core Team retreats, the CCR Consultation and meetings, and the Youth Action Gathering
- Develop leadership, organizational, facilitation, and public speaking skills.
- Bring the voice of your community into policy related conversations.

- Network with CCR members, academics, policy makers, advocates and mentors.
